SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are NPDES

permit applicants that request a variance from the conditions that would normally be imposed on the applicant's discharge or NPDES permittees that request a modification of the NPDES or sewage sludge management permit conditions.

Title: NPDES Modification and Variance Requests (OMB Control No. 2040-0068, EPA ICR No. 0029.07) expiring 8/31/98.

Abstract: This ICR calculates the burden and costs associated with modifications and variances made to NPDES permits and to the National Sewage Sludge Management Program permit requirements. The regulations specified at 40 CFR 122.62 and 122.63 specify information a facility must report in order for the U.S. Environmental Protection Agency (EPA) to determine whether a permit modification is warranted. A NPDES permit applicant may request a variance from the conditions that would normally be imposed on the applicant's discharge. An applicant must submit information so the permitting authority can assess whether the facility is eligible for a variance, and what deviation from Clean Water Act (CWA) provisions is necessary. In general, EPA and authorized States use the information to determine whether: (1) the conditions or requirements that would warrant a modification or variance exist, and (2) the progress toward achieving the goals of the Clean Water Act will continue if the modification or variance is granted. Other uses for the information provided include: Updating records on permitted facilities, supporting enforcement actions, and overall program management, including policy and budget development and responding to Congressional inquiries. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
